# Career Development

In the course of TIS, our lecturer has plan some experience sharing talk for us to more understanding about the career development and what are we learning right now. The first talk is held in Dewan Seminar N28 UTM which conducted by Mr. Habib , co-founder for GETMEHIRED company in 23rd October 2023 and the second talk have invited PPG Company at the venue of Hutan Rekreasi UTM in 28th October 2023. Both of the talk is about the ways and preparation of us to get hired after graduate by the companies we prefer and understand for the career and position in the company for the future.
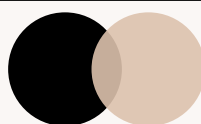

Sabrina Heng

Introduction

As an university student right now, we may have some plan for our future pathway whichwhat kind of organisation we want to enter or what type of work we want to do. Therefore,that is the importance of a career development. We must have the concept of the career development of our life after graduate. But what is a CAREER DEVELOPMENT ?

CAREER DEVELOPMENT is refer to a process which an individual will undergo to evolve their occupational status. It is a lifelong process brings you closer to your ideal job, skillset, and lifestyle.The example of the career development
such as taking online courses, watching seminars or finding a mentor at work.

Content of Talk

For the first speaker which is Dr. Habib has introduce her company GETMEHIRED who help people to prepare the resume by their template for applying to others company. In his speaking, I have learned that resume is the most important part which a company saw first before interview session. Otherwise, I also noticed that resume cannot be infographic resume as a lot of companies are not accept infographic resume. For the second team which is PPG company have brings us about their company's introduction and their division of work. Moreover, I also get to know what data engineering do in a company and also information about big data, data lake and data system.

Reflection

- the ways to build a resume
- importance of resume when finding works
- knowledge about big data, data lake
- programming frequently used by the company
- ICT is important in industry as it makes a business more efficient and promptly respond to customers' needs.

Way Forward

We need to be prepared since we are in university as this is what career development means and to reach our goals in the future.
